

## **Job Posting - Phenex Pharmaceuticals AG, May 09th, 2007**

Phenex AG is a biopharmaceutical company focussing on drug discovery with nuclear receptors. Our Discovery Services unit offers a broad panel of assays and screening capabilities to the pharmaceutical industry. With these services we have established ourselves as a recognized leader in the field of nuclear receptor services with more than 25 industrial customers from Europe, Japan and North America.

In our own proprietary drug discovery programs we seek to develop new drug candidates for applications in metabolic and gastrointestinal diseases by targeting certain nuclear receptors.

Phenex AG is financed by revenues from our Discovery Services and by equity funding coming from institutional and private investors with a true long term perspective. In order to expand our proprietary drug discovery programs we offer the following positions:

### **1. Senior Drug Discovery Scientist**

### **2. Medicinal Chemist**

### **3. Technicians qualified in molecular biology and biochemistry**

1. The Senior Drug Discovery Scientist should hold a Ph.D. in biochemistry or pharmacology and should have 5+ years industry experience in small molecule drug discovery with a focus on assay development, high content assays and/or PK and efficacy animal experiments.

2. The Medicinal Chemist should hold a Ph.D. in organic chemistry and should have at least three years experience in medicinal chemistry in an industrial setting.

3. Technicians should have at least three years professional experience in molecular biology or biochemical techniques. We would prefer candidates with practical experience in compound assay technologies, chromatin immunoprecipitation and Taqman® qRT-PCR.

Phenex is a steadily growing, independent company, located in the heart of the Rhine Neckar Triangle (Heidelberg, Mannheim, Ludwigshafen). We offer the tantalizing and challenging environment of a small biotech company with a motivated team and flat hierarchies.
