

## Application examples for the Mammalian-2-Hybrid system

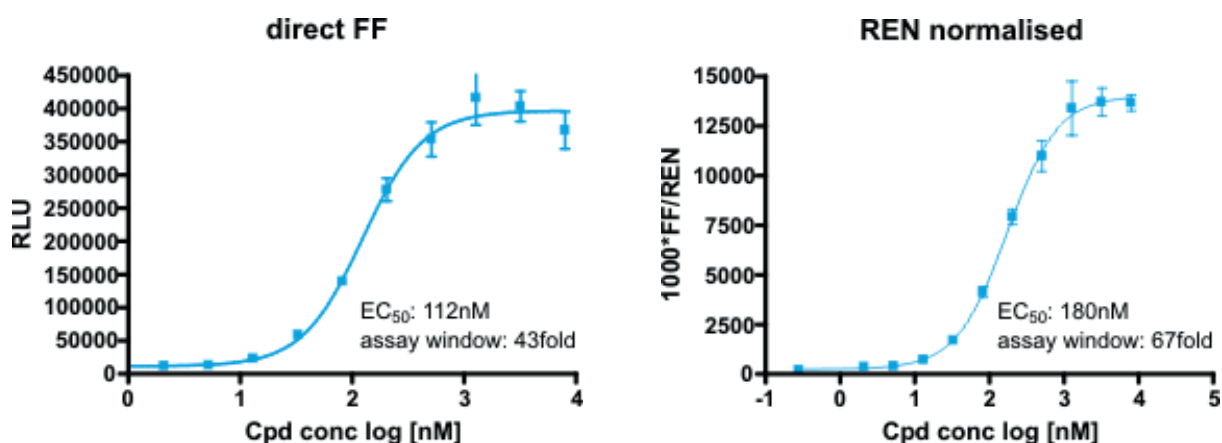

M2H - Liver X Receptor alpha (LXRα) plus NCoA3 and Liver X Receptor alpha plus NCoR with control agonist T0901317

M2H - Androgen Receptor (AR) plus NCoA3 with control agonist Dihydrotestosterone

M2H - Constitutive Androstane Receptor (CAR) plus NCoA3 with control agonist CITCO

M2H - Estrogen Related Receptor gamma (ERRg) plus PGC1 with control antagonist 4-Hydroxytamoxifen
