## Cancer Research Scientist (m/f)

In order to broaden our activities and expertise in the field of Cancer Research we look for a senior scientist (m/f) for a permanent position at our research site in Heidelberg, Germany. Applicants should have the following qualifications:

- Exam (Diploma, MSc) and promotion (Ph.D., Dr. rer. nat.) in biology, biochemistry of medicine (M.D.) or any related subject with a strong focus on lab research
- Multiple years of experience (> 4 years) in basic, preclinical or translational cancer research with a clear focus on own lab activities
- Broad spectrum of techniques of biochemistry, molecular and cell biology, cancer models (xenografts, syngeneic or autochthonous, special cell assays) and/or immunological techniques
- Clear attitude towards taking projects into clinical stage (“translational medicine”), proven by professional experience at an excellent cancer research institute or in the industry
- Excellent skills in English language are mandatory

For working with us in a leading position, candidates should have the following skills, capabilities and attitudes:

- Team spirit and a strong willingness to share tasks, failures and successes
- Curiosity to dive into new topics and challenges
- Cooperativeness, the willingness to train new team and lab members
- A strong motivation to turn science into medicines

We expect good skills in all necessary and relevant computer software for office work and for the analysis of lab data. Candidates should be well prepared to present results of their scientific work at international conferences or to potential collaboration partners. We expect a complete list of scientific publications and patents and at least two personal references to be contacted along with a CV.

Phenex AG is a very successful German biotech company with a track record in developing new, innovative small molecule therapies in the field of liver and immune-related diseases. Having closed two highly valued partnering deals with leading US pharma companies such as Janssen and Gilead we are financially well secured and have launched broader research efforts in the fields of liver/metabolic research as well as cancer. We are committed to develop new groundbreaking therapies in these fields in order to become a leading R&D driven biopharmaceutical company.

Please send you application by email (deadline: Jan 31, 2019) to:

Dr. Sanja Perovic-Ottstadt
